Aref Koohzadi

Senior 2D Game Developer · PixiJS, TypeScript

aref.koohzadi@gmail.com · +98 905 216 6314 · linkedin.com/in/aref-koohzadi · github.com/arefkoohzadi

Summary

Senior 2D game developer with over 5 years designing and developing real-money slot and Keno games in TypeScript, JavaScript, and PixiJS. Delivered more than 30 high-performance games for global online casino markets. Worked on titles integrated with Light & Wonder (L&W), SG Digital, Lightning Box, and GamesLab. Focused on front-end game architecture, animation systems, and performance across browsers and mobile.

Experience

Senior Front-End Game Developer Oct 2020 — Feb 2026

Boomerang Studios — Remote (Australia-based)

- Developed, optimized, and launched 30+ slot games and multiple Keno games for international online casino platforms.
- Collaborated on projects integrated into Light & Wonder (L&W), SG Digital, Lightning Box, and GamesLab.
- Built reusable UI components, flexible reel setups, and game logic with PixiJS and TypeScript.
- Kept rendering at 60 FPS across mobile devices and desktop browsers.
- Used Jira, Git, and Bitbucket in a cross-functional Agile remote team with backend engineers and artists.
- Introduced internal debugging tools and animation preview systems that shortened the team pipeline.

Selected titles

Original feature work from the Boomerang period. Live demos are linked from github.com/arefkoohzadi.

- **Thundering Shenlong.** Original Thundering state machine and particle sequences, later reused for Thundering Gorilla and Thundering Box Keno. Also shipped on Light & Wonder.
- **Egglink Chicken Fox.** First Egglink accumulator: projectile trajectories into a roof housing, with many falling eggs at 60 FPS. Later used on further Egglink titles.
- **Hotcakes.** Jackpot pick feature combining Spine 2D, keyframe controllers, and sprite sheets, plus a spatula-flip respin. WebP texture atlases, with initial loads under two seconds.

Also shipped: Chicken Fox Jr, Stellar Cash Chicken Fox 5x, and the Thunder Drums series (Leaping Lions, Serengeti Suns, Samurai Storm).

Skills

Languages and frameworks: TypeScript, JavaScript (ES6+), Vue.js
Game development: PixiJS, WebGL, Spine animation, 2D visual effects
Tools: Git, GitHub, Bitbucket, VS Code, Jira, Agile, Scrum
Mathematical modeling: MATLAB, numerical analysis, numerical methods

Education

M.Sc. in Numerical Analysis Sep 2013 — Aug 2016

University of Mazandaran

Languages

English — Professional working proficiency.
