Summary

Full-stack developer working with Vue.js, TypeScript, Node.js, and Express. Since April 2026 I have been building interfaces and APIs at Fidarkaran. From October 2020 to February 2026 I was a senior front-end game developer at Boomerang Studios, shipping 30+ slot games and multiple Keno games in TypeScript and PixiJS.

Experience

Full-Stack Developer Apr 2026 — Present

Fidarkaran

- Develop and maintain APIs and backend services with Node.js and Express.
- Build interfaces with Vue.js and TypeScript.
- Take part in front-end and back-end architecture for the project.
- Work in an Agile team on implementation, review, and delivery.

Senior Front-End Game Developer Oct 2020 — Feb 2026

Boomerang Studios — Remote (Australia-based)

- Built reusable interface components with Vue.js and TypeScript, including UI for internal tools.
- Introduced debugging and animation-preview tools used in the development workflow.
- Shipped 30+ slot games and multiple Keno games for Light & Wonder, SG Digital, Lightning Box, and GamesLab.
- Kept 60 FPS rendering on mobile devices and desktop browsers, working with artists and backend engineers in Agile cycles.
